portfoliovik.netlify.app

Delhi, India

PROFESSIONAL SUMMARY

Results-driven Frontend Developer with hands-on experience building and deploying responsive, production-grade web applications using React.js and modern JavaScript. Delivered 5+ real-world deployed projects spanning doctor appointment booking, job discovery, restaurant ordering, and interactive 3D experiences. Skilled in component-driven architecture, REST API integration, React Router, and Tailwind CSS. Strong foundation in JavaScript, Java, OOP, and problem-solving. Knowledgeable in backend concepts including Node.js, Express.js, and MongoDB through academic study. Pursuing MCA to deepen expertise in full-stack and software architecture. Immediately available for Frontend Developer, React Developer, and Full Stack Developer roles.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js, React Router, Tailwind CSS, Responsive UI Design

Backend: Node.js, Express.js, REST API Development, JWT Authentication, CRUD Operations

Database: MongoDB, Mongoose ODM

Languages: JavaScript, Java, OOP Principles, Data Structures & Algorithms (DSA)

Tools & Platforms: Git, GitHub, VS Code, Netlify, Vercel, Render, Spline 3D

Concepts: Full Stack Development, API Integration, SDLC, Agile, Problem Solving, Deployment Pipelines

PROJECT EXPERIENCE

DocConnect — Doctor Appointment Booking Application | *React.js, Tailwind CSS*

- Engineered a fully responsive doctor appointment booking platform using React.js and Tailwind CSS, enabling users to browse doctor listings, view specializations, and book appointments through an intuitive UI.
- Built a multi-page SPA with dynamic routing via React Router, delivering smooth navigation across doctor profiles, appointment scheduling, and confirmation flows.
- Designed and implemented reusable React component architecture — including doctor cards, booking forms, and filter panels — ensuring scalability and consistent UI patterns.
- Applied Tailwind CSS utility classes to deliver a mobile-first, fully responsive layout optimized for all screen sizes and devices.
- Managed application state across components using React hooks (useState, useEffect), handling dynamic data rendering and UI interaction logic efficiently.
- Deployed the application on Netlify with a production-ready build pipeline, demonstrating end-to-end ownership of the frontend development lifecycle.

Restaurant Ordering Platform — Dynamic Food Ordering System | *HTML5, CSS3, JavaScript, MongoDB*

- Developed a full-featured restaurant ordering web application from scratch — without frameworks — showcasing deep command of core JavaScript, DOM manipulation, and event-driven programming.
- Implemented a fully functional cart system with add/remove item logic, real-time order totals, and smooth UI interactions, earning a project score of 93/100.
- Built backend storage using MongoDB to persist order data, applying CRUD operations and basic data modeling principles.
- Delivered a clean, responsive UI with intuitive navigation, reflecting attention to user experience and frontend best practices.

Find N Win Jobs — Job Discovery Platform | *React.js, Tailwind CSS, REST APIs*

- Engineered a responsive job-search application with dynamic listings, category filters, and reusable UI components built in React.js and styled with Tailwind CSS.
- Integrated external REST APIs to fetch and display real-time job data, handling asynchronous operations and loading states with React hooks.
- Optimized component architecture for reusability and scalability, applying separation of concerns across functional components.
- Deployed the application on Netlify with CI/CD-ready configuration for seamless updates.

Developer Portfolio — Personal Brand & Project Showcase | *React.js, Tailwind CSS*

- Designed and developed a fully responsive, performance-optimized personal portfolio website showcasing projects, technical skills, and professional background.
- Implemented smooth CSS transitions, scroll-based animations, and mobile-first layouts to deliver a polished user experience across all device sizes.

Live: portfoliovik.netlify.app

3D Interactive Web Experience — Immersive Frontend Application | *React.js, Spline 3D, Tailwind CSS*

- Built an interactive 3D web application by integrating Spline 3D models into a React.js frontend, enabling real-time 3D object rendering and animation within the browser.
- Demonstrated advanced frontend capability by bridging WebGL-based 3D tooling with modern React component architecture for an immersive user experience.

EDUCATION

Master of Computer Applications (MCA)

2025 – 2027 | Current

Manipal University Jaipur (Online)

Deepening expertise in software engineering, algorithms, and system design.

Bachelor of Computer Applications (BCA)

2022 – 2025

IP University — TIPS Dwarka, Delhi

CGPA: 9.0 (Final Semester) | Overall CGPA: 7.0 | Major Project Score: 93/100

ACHIEVEMENTS & CERTIFICATIONS

- Scored 93/100 in BCA 6th Semester Major Project — Restaurant Ordering Platform (Top Project in Batch).
- Achieved 9.0 CGPA in final semester of BCA, reflecting strong academic performance and technical depth.
- Completed Web Development Internship at Codsoft — hands-on exposure to real-world development workflows and professional SDLC practices.
- Engineered and independently deployed 5 production-ready web applications across Netlify, Vercel, and Render.
- Consistent self-learner: expanded skill set from vanilla JavaScript to MERN Stack, 3D web, and API-driven architectures within the BCA program.
